

# XSITE<sup>®</sup> MANAGE CLOUD SERVICE

Connect machine control systems, users  
and survey data in to one platform

# ENSURE HIGH QUALITY ON YOUR EARTHWORKS

## Connect machine control systems, users, and survey data to the Xsite® MANAGE cloud platform

With Xsite® MANAGE, construction professionals can work smarter, use resources more efficiently, and become more competitive. The service suits any construction site that uses Xsite's machine control systems or surveying equipment.

Xsite® MANAGE offers an accessible platform for construction data management and provides a fast, reliable, and user-friendly way for data transfer between the office and the field.

**"Xsite® MANAGE cloud service enables you to achieve the quality requirements of construction projects easily and more efficiently than ever."**

Want to start using the service? Contact your local Xsite reseller today!

Xsite® MANAGE!

## Enjoy the seamless and easy data transfer between the office and the field

Xsite® MANAGE shares up-to-date information to all project parties in real-time.

- Share data between machines, devices, and users
- Sync files to connected machines
- Sync as-built information to MANAGE
- Other machines and users can see models and points created with machine control in the same project

## Visualize your construction data in a smooth 3D-view

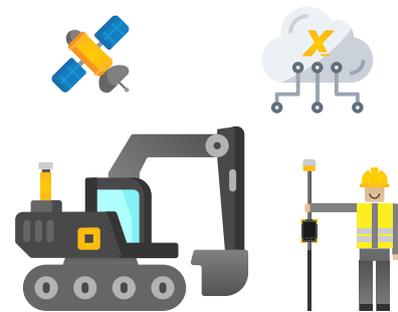

The service enables visualization of construction and as-built data as part of the worksite's data management.

- Surface models
- As-built points
- Log/surveying points
- Background/2D maps

## See the locations of your machinery on a map

Xsite® MANAGE shows the locations of connected machines in a map view. You're also able to see the activity of your machines.

## Export as-built data for further processing

Export as-built data easily e.g., for quality documentation. Point data can be filtered and exported in various data formats.

## OTHER FEATURES INCLUDE

### Remote Connection

Remote connection enables accessing the machine control systems wirelessly, and operate the system remotely in real-time.

### 3rd Party API

Simplify data transfer from third party applications, machines, and surveying equipment. Contact Xsite HQ (Novatron) for more information!

### Multi-Access

The multi-access feature enables you to be a member of various organizations and administrate the data on their behalf.
